## DETAILED ACTION

### *1. Election/Restriction*

- A. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 194-215 and 217-252, as drawn to a method of identifying a compound using the T1R3 of SEQ ID NO:7, classified in class 435, subclass 7.2.
  - II. Claim 194-208 and 216-252, as drawn to a method of identifying a compound using the T1R3 of SEQ ID NO:4, classified in class 435, subclass 7.2.
- B. The inventions are distinct, each from each other because of the following reasons:

Inventions I-II are independent and distinct, each from each other, because they use products (SEQ ID NO:7 and 4) which possess characteristic differences in structure and function and each has an independent utility that is distinct for each invention which cannot be exchanged.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter as defined by MPEP § 808.02, the Examiner has *prima facie* shown a serious burden of search (see MPEP § 803). Therefore, an initial requirement of restriction for examination purposes as indicated is proper.

- C. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR § 1.48(b) and by the fee required under 37 CFR § 1.17 (h).
